

FREYA LEVY

Wheelchair Sports Champion

In 2010, Freya was diagnosed with Muscular Dystrophy, a disease that causes weakness and loss of muscle mass. Faced with the challenges of living with a disability, Freya had to find a new focus, a new sport – and that's what she came across Wheelchair Basketball.

Now championing disability and showing what's possible with resilience, Freya has competed in: England's Wheelchair Rugby League, England's Wheelchair Rugby Sevens, Wheelchair Basketball for GB, and Para Ice Hockey Player.
